ABOUT ME

I am currently a dedicated Information Technology Final Year student at RMIT Vietnam. Throughout my time at university, I have been proactive in multiple FullStack and AI/ML projects. In addition, I am often recognised as a motivated and dependable Project Leader by my teammates. My ultimate goal is to become a DevOps Engineer!

EXPERIENCE

IT Customer Services Officer - On-site

06/2023 - Current

RMIT IT Services

- Technical Support: Provided in-person and remote support to the RMIT SGS Campus community, enhancing system usability.
- Cross-campus Project Operation: Actively participated in cross-campus projects between Vietnam and Australia, focusing on system and software security enhancements.
- Personal Project: Automatically update and manage RMIT devices' status with PowerShell, Active Directory CLI, PDQ Inventory and Excel.

PROJECTS

RMIT Business Plan Competition Landing Page - Technical Leader 06/2023 - 10/2023

RMIT FinTech x The Business School

- Tech Stack used: React, Vite, i18n, Tailwind, Firebase Hosting, Google Analytics
- With a team of 6 people, we have built a landing page for the national competition that supports built-in English and Vietnamese. Our stakeholders - The Business School - would review the landing page design every week.

RBLOG - Front End Developer

10/2022 - 01/2023

RMIT Vietnam - Building IT System - COSC2634

- Tech Stack used: MongoDB, Express, React, Node.js, TailwindCSS
- With a team of 4 members, we were given eight weeks to build and deploy a blogging community platform that is easy to use.
- Link to Web App Demo: RMIT Blog

RMIT Store - DevOps Engineer

01/2024 - 02/2024

RMIT Vietnam - DevOps - COSC2676

- Tech Stack used: GitHub Actions, Jenkins, AWS Kubernetes, Ansible, Docker
- By forming a team of 4 members, we were given four weeks to build a development and production environment for a given RMIT Store Website. These two environments must be separated by a Pytest to ensure the availability and scalability of the website.
